PROFESSIONAL SUMMARY

Full-Stack Software Engineer with a strong foundation in both front-end and back-end development. Former teacher turned developer, bringing excellent communication, problem-solving, and user-centered design skills to every project. Proficient in building scalable, responsive web applications using JavaScript, React, Python, Django, Node.js, and SQL. Thrives in collaborative, agile environments and is passionate about making technology inclusive, accessible, and meaningful.

TECHNICAL SKILLS

JavaScript • Python • Typescript • SQL • React • Vite • Node.js • Express.js • Django • JSON • AWS • JWT • npm • RESTful APIs • PostgreSQL • NoSQL • Open API • MongoDB • Postman • Git • GitHub • Heroku • Vercel • Railway • Supabase

PROFESSIONAL EXPERIENCE

Software Engineer - YouFirst.Agency | 2025 – Present

Develop full-stack web applications for client-facing projects, translating business needs into scalable, user-centered technical solutions within an agile, collaborative environment.

- Design and build responsive front-end interfaces using JavaScript, React, and Vite, prioritizing accessibility, performance, and intuitive user experience.
- Develop and maintain RESTful APIs using Node.js, Express, Python, and Django to support dynamic, data-driven applications.
- Architect and manage databases using PostgreSQL and MongoDB ensuring efficient data modeling including designing and maintaining database documentation and ERDs.
- Implement authentication and authorization using JWT to create secure experiences for multiple user types.
- Apply Git and GitHub version control best practices and contribute to code reviews to ensure clean, modular, and maintainable code.
- Deploy and manage applications using Heroku and Vercel, monitoring performance and troubleshooting production issues as needed.
- Contribute to technical planning discussions, balancing scalability, performance, and user needs.

Career Break | 2023 – 2025

Focused on raising a young family, managing the household, and personal development while preparing to reenter the workforce as a software engineer.

Elementary Teacher - Lashon Academy | 2021 – 2023

Directed a classroom focused on core academic subjects with an emphasis on personalized learning, data-driven instruction, and collaborative problem-solving. I approached teaching the way I now approach coding; with curiosity, empathy, and a focus on continuous improvement.

- Integrated digital learning tools into daily curriculum, sparking a transition into tech.
- Developed differentiated instruction strategies, demonstrating adaptability and the ability to communicate complex ideas to diverse audiences.
- Collaborated with cross-functional teams to align on student progress and goals.
- Managed multiple simultaneous projects, honing project management and time prioritization under dynamic conditions.
- Regularly participated in team lesson planning sessions and exchanging feedback.

Preschool Teacher - Rainbow Children's Center | 2015 – 2021

Led a dynamic early childhood learning environment, designing and delivering lesson plans that fostered creativity, problem solving, and foundational skills through iterative, student centered approaches.

- Designed and delivered developmentally appropriate, engaging lesson plans for children aged 3 to 5, fostering early cognitive, social, and emotional growth.
- Collaborated closely with colleagues to create cohesive curricula and share best practices.
- Built strong relationships with families to support student development and communicate progress, honing interpersonal communication skills.

Dance Instructor (Multiple Studios) | 2010 – 2019

Led weekly classes and individualized instruction across multiple age groups

- Fostered inclusive classroom environments focused on growth and expression
- Assisted organizing recitals and performances; balanced creativity with time management
- Fostered a positive, inclusive classroom culture by promoting teamwork, respect, and individual growth.

EDUCATION

Software Engineering Immersive - General Assembly | Completed 2025

Completed a full-time, intensive program focused on full-stack web development using modern frameworks and industry best practices.

- Built and deployed applications using JavaScript, React, Python, Django, Node.js, Express, and PostgreSQL
- Created RESTful APIs and focused on clean, modular code architecture
- Collaborated on a team-based final project simulating a real-world Agile dev cycle
- Deployed apps using Heroku and Vercel; used Git and GitHub for version control
- Strengthened self-management, time tracking, and remote collaboration

Master of Arts in Teaching (MAT)

University of Southern California • Completed 2022

Bachelor of Arts in Liberal Studies
